

CELLBRITE: HANDYLite

From the CELLBRITE range of battery powered products comes the low cost, high performance HANDYLite.

HANDYLite is a portable, compact, robust and versatile, hand held, battery operated luminaire utilising an 18 Watt compact fluorescent lamp which gives a light output of 1200 lumens.

HANDYLite comes complete with a mains and 12 Volt charger and the dry lead acid battery will operate for 5 hours after being fully charged.

The battery cannot be overcharged or damaged by being left on charge. The battery charger is 'intelligent' and shows that charging is underway with a red light and that the battery is fully charged with a green light.

HANDYLite is designed for indoor use, in areas where mains lighting is limited or not available.

The unit weighs only 4.5 kilos and is 250mm long, 260mm wide and 340mm high, which combined with the pivoting head, the 18 Watt low energy lamp and cool running makes the HANDYLite perfect for use in confined spaces.
