

CELLBRITE: MEGALite

The MEGALite 8700 is the most powerful portable rechargeable floodlight available.

The MEGALite has three 36 Watt compact fluorescent tubes with a combined light output of 8700 lumens. It has a running time of 3 hours on full power or 10 hours on low power. From fully depleted it takes 6 hours to charge using the standard 24A intelligent charger.

The battery cannot be overcharged or damaged by being left on charge. The battery charger is 'intelligent' and shows that charging is underway with a red light and that the battery is fully charged with a green light.

MEGALite comes complete with a very robust aluminium tripod extendable from 1.5 to 3.5m. With the centre portion of the tripod locked into the polyethylene, rust proof, non conductive battery enclosure there are no trailing leads to cause a tripping hazard. This arrangement also adds the weight of the battery to the tripod, ensuring stability in use.

The light head is manufactured from ABS plastic with a polycarbonate lens protecting the fluorescent lamps. The unit can be used either with all three lamps lit or just one. With the optional 38A power pack the lamp will run for 4.5 hours on full power and an impressive 15.5 hours on low power.

MEGALite is used by the Emergency Services, Military, Construction and maintenance contractors.

Options include:

- 38A power pack - Item Number S170166
- 5m 12V ext. lead - Item Number S140197
- Carrying bags (2) - Item Number S140198
- Ground Pegs - Item Number S140199
- 6 way Multi-charger - Item Number S140200
- 16A output charger - Item Number S140212 *

* For charging the MEGALite whilst it is in use.
