

CELLBRITE: BEACONLite

The BEACONLite is a portable, battery powered luminaire. It utilises an electronic ballast to power a 26 Watt compact fluorescent lamp, which benefits from low power consumption, cool running and has none of the glare associated with tungsten halogen lighting. Light output is 1800 lumens.

When fully charged the 12A dry lead acid battery will power the lamp for a running time of 6 hours. To charge the unit from a fully depleted state takes 6 hours. The Beacon is sold complete with charger.

The battery cannot be overcharged or damaged by being left on charge. The battery charger is 'intelligent' and shows that charging is underway with a red light and that the battery is fully charged with a green light.

The lamp is housed in a robust polycarbonate diffuser providing 360 degree light output. The top of the diffuser can be unscrewed to allow quick and easy replacement of the fluorescent lamp.

The base, housing the battery, is made from polyethylene, which makes the unit light weight and impervious to rust.

The Beacon weighs under 6 kilos and stands only 365mm high when upright, and is therefore highly portable. The Beacon can be used upright or inverted, handheld, standing or hanging. The unit is designed for use outdoors.

Options include:

Light shield (alters light from 360 to 180 degrees)	Item Number S020396
12 Volt vehicle charger	Item Number S020397
42 Watt lamp (this will reduce the running time)	Item Number S020398

Item Number	Type
S020378	BEACON/26W/12V/12A C/W Mains charger
