

Festoon Lighting

Blakley Electrics Festoon Lighting Strings meet the requirements of BS7375:1996 and are designed for 110V operation on Construction Sites. The basic festoon string comprises of 2.5mm² 2 core Yellow PVC Arctic Grade cable with a moulded-on ES or BC, 60W lamp holder at 2 metre, 3 metre or 5 metre intervals. Plain strings are supplied in 100 metre lengths and kits complete with lamps, guards or safety covers are supplied in 100M and 25M lengths. A limited range of festoon made from Low Smoke and Fume cable is stocked and a wider range can be made to order.

New Product

Low Energy Festoon Kits are a new addition to our range and they are supplied with 110V 13W Compact Fluorescent Lamps (CFL) in place of 60W GLS lamps. The 13W CFL has a greater light output than a 60W GLS lamp but consumes less than 25% of the power and has 5 times the expected lamp life. 13W CFLs are available with ES or BC caps and fit into a standard lamp holder. They can also be used in conjunction with our standard Festoon Guard or Safety Cover.

Item Nos. S060004 & S070059
Festoon String, 100M & Guards

Item No. S060161
Festoon Kit with CF Lamps

Item No. S060491D
Festoon Kit with GLS Lamps

Festoon Guard - S070059
Festoon Safety Cover - S060393
