

Protected Sockets for Aircraft Hangars and Hardened Aircraft Shelters

Power Clusters for Ground Support Equipment (GSE)

Technical Bulletin 03/05 specifies the installation of RCD and Pilot Earth Monitored (PEMs) protected sockets in Aircraft Hangars and Hardened Shelters. It supersedes the previous Technical Bulletin TB 97/40 and SEG 148, which results in the following changes to the assembly:

1. A new pattern of socket outlet across the complete range of 16A, 32A, 63A and 125A, single or three-phase.
2. Where suitable the use of a 30 mA RCD in place of an earth leakage relay.

Blakley 230V / 400V 50 Hz Hangar Supply Units are designed for wall mounting and incorporate the following features:

- IP55 Heavy Duty Steel or Insulated Enclosure
- Angled Socket Plate
- Top and Bottom Cable Entry
- 30 mA RCD Protection
- External ON / OFF Push Button
- On Lamp
- Diode Reversal Switch
- Pilot Core Protection Selection Switch
- PEMs and RCD Trip Indication
- Test Buttons
- Current Ratings of 16A, 32A, 63A and 125A, single or three-phase
