

CT Chambers for Electricity Metering

The CTC range of ALL INSULATED CT Chambers, in current ratings of 400A, 800A and 1600A, is designed for use by the Electrical Supply Industry.

The CTC range is widely used in the London area of EDF and variations have been supplied for installations in the SEEB and Eastern areas of EDF, as well as in Scottish & Southern Supply areas.

CTC series CT Chambers are sealable and they incorporate: a Meter Test Terminal Block; a steel back plate with insulated shroud; sleeved bus bars; a polycarbonate, transparent inset panel with oversized slot, enabling the Meter Test Block terminals to be accessed without the need to remove the inset panel. An entry slot is provided in the base of the enclosure with a plain paxolin cover that can be drilled on site.

Also available for Temporary Builders Supplies, the CTC/ARC400 and CTC/ARC800 combine a CTC series CT Chamber with an ARC series 4P All-Insulated RCD, at 400A and 800A.

Standard Item Numbers

Item Number	Type Number	Description
S030096	CTC/400	CT Chamber, 400A
S030097	CTC/800	CT Chamber, 800A
S030229	CTC/1600	CT Chamber, 1600A
S030053	CTC/ARC/400	Combined CT Chamber & RCD, 400A (see separate Data Sheet)
S030986	CTC/ARC/800	Combined CT Chamber & RCD, 800A (see separate Data Sheet)
