Construction

We supply the widest range of conventional, free standing Mains Distribution Assemblies in ratings from 100A to 3200A. In addition, we have an expanding range of assemblies designed to reduce energy consumption and help manage construction site lighting and power.

B2 SERIES MDA WITH TIME CLOCK - with shield plate removed

Heavy Fabrication

For Offshore Rig Fabrication, Shipbuilding and Ship Maintenance, we have designed and built bespoke, heavy duty distribution assemblies for the most arduous operating conditions.

SPECIAL ASSEMBLY, 250A

Film and TV

Intake Switch Units, Control Centres and Final Distribution Units manufactured in accordance with BS5550, incorporating single pole connectors up to 400A and multi-pole plugs and sockets up to 125A. Available in steel, rubber or polypropylene enclosures. Fixed assemblies for studios can also be supplied.

IDA SERIES ASSEMBLIES

Tunnelling

Heavy duty, high IP rating Tunnel Distribution Assemblies, Cable Link Boxes, Transformers and Luminaires, to meet the requirements of BS 6164. 1000 volt LV distribution packages are available for projects with long cable runs.

TUNNEL DISTRIBUTION ASSEMBLY

Outdoor Events

Auto Mains Failure Panels, Hard Wired and Plug-in Mains Distribution Assemblies, all with the option of heavy duty crash frames to minimise damage both in transit and in general operation. Portable distribution assemblies are also available.

Military

Purpose built Plug-in distribution assemblies from 13A to 3200A, to supply semi-permanent Tented Camps. Field distribution assemblies for other military applications are also available.

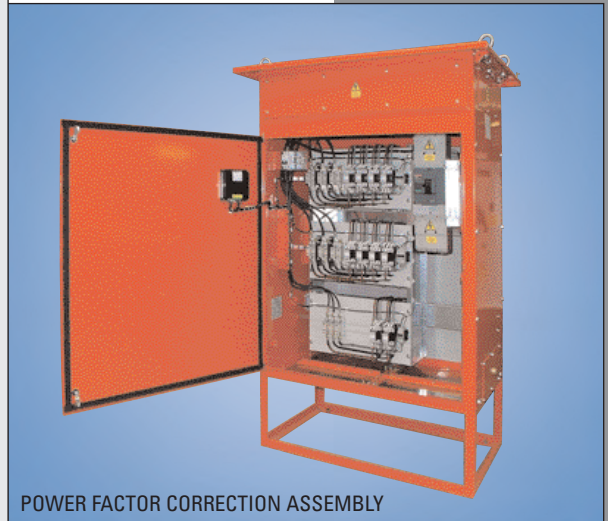

GENERATOR INTERFACE UNIT, 800A

Blakley Electrics have unrivalled experience in the design and manufacture of mains voltage distribution equipment for Temporary Installations. Products include: complex, high current Automatic Mains Failure systems to maintain essential supplies in Tunnel projects; free standing Mains Distribution Assemblies for construction or civil engineering projects; Portable Distribution Assemblies for Outdoor Events, as well as products designed to reduce energy usage and therefore emissions.

All TemPower products are designed and manufactured within the scope of our accreditation to ISO9001:2000. Assemblies generally conform to BS EN 60439-4, BS 5550 or BS 6164, as appropriate. A wide range of independent Type Testing has been carried out to BS EN 60439 including: ASTA Testing of bus bar systems up to 50 kA; Ingress Protection of enclosures up to IP56; Corrosion Protection afforded by finishing systems for heavily polluted environments.

If you can't find a product that meets your requirements, please contact our Customer Service Centres. We thrive on new challenges!

THE POWER PROFESSIONALS

HIGHER POWER

110V Portable Power & Lighting Products

TRANS POWER

Power Transformers up to 50kVA for Indoor and Outdoor Applications

SAFE POWER

Safe Supply Units, Sensor Based RCD Protection plus RCD & Monitored Earth Protected Sockets for Industry and Education

TEM POWER

Temporary Distribution Assemblies for Construction, Events, Film & TV and the Military

PRO POWER

Permanent Distribution Assemblies for Outdoor, Arduous or Special Applications

GREEN POWER

Distribution and Lighting Equipment Designed to Provide Reduced Energy Consumption
