

When it comes to designing and manufacturing special distribution assemblies, there is the **Blakley Way**.....

Blakley have unrivalled experience in the design and manufacture of transformer, protection and distribution assemblies for permanent and temporary installations. All products are produced in accordance with our ISO9001 accreditation and draw on five decades of experience.

The image above shows the internal view of a 40kVA Dockside Transformer and the image to the right shows a floor mounted, multi-voltage distribution assembly for an aircraft workshop (A7290411).

Please contact us to discuss standard or special assemblies.

.....or there's the other way.....!

To avoid the "other way" specify Blakley Electrics and accept no substitutes!

Experts in **high performance**
power and lighting products
