

ESD series Switch Disconnectors

Enclosed Switch Disconnectors rated from 125A to 630A to supply tower cranes, hoists, etc. The range has been extended to include models with two outgoing MCBs, which are intended to supply twin cage hoists. All models incorporate an additional single-phase MCB / RCD to feed floodlights or other local supplies.

Enclosure

Wall mounting, sheet steel, padlockable, providing protection to IP 54.

Mains Disconnecter

TP with solid neutral at 125A, 160A, 250A or 400A
 4 pole at 200A and 630A
 Switches are padlockable in OFF position.

Terminals

Incoming: shrouded to IP2X
 Outgoing: heavy duty stud type for Standard ESDs
 Supply and load terminations can be reversed on models without outgoing TP MCBs

Distribution

All models: 32A SP MCB / 30 mA DP RCD.
 See table below for ratings of MCBs fitted to models intended to supply twin cage hoists.

Stand

Optional galvanized stand
 Non-standard and higher current ESD assemblies can be made to order.

Type ESD/3N/160/RCBO-32A, Part S190295

Type ESD/4P/200/C2-125/RCBO-32A, Part S190301

Part No.	Type	Description
Standard ESD Assemblies		
S190294	ESD/3N/125/RCBO-32A	125A TP+N Switch plus 32A SP MCB + RCD, 30mA
S190295	ESD/3N/160/RCBO-32A	160A TP+N Switch plus 32A SP MCB + RCD, 30mA
S190225	ESD/3N/250/RCBO-32A	250A TP+N Switch plus 32A SP MCB + RCD, 30mA
S190361	ESD/3N/400/RCBO-32A	400A TP+N Switch plus 32A SP MCB + RCD, 30mA
S190363	ESD/4/630/RCBO-32A	630A 4P Switch plus 32A SP MCB + RCD, 30mA
ESD Assemblies for Twin Cage Hoists		
S190299	ESD/3N/125/C2-80/RCBO-32A	125A TP+N Switch plus 2 x 80A TP MCBs and a 32A SP MCB + RCD, 30mA
S190301	ESD/4P/200/C2-125/RCBO-32A	200A 4P Switch plus 2 x 125A TP MCBs and a 32A SP MCB + RCD, 30mA
S140593	Hot Dip Galvanized Stand, to suit any of the above
